

I would like to comment on the installment of so many censorship laws. The latest FCC request that all radio and television programs be taped for appeal if someone complains that they are inappropriate is a large and I think unnecessary financial burden on stations, especially small and private ones. This request would be directly in violation of the first amendment, freedom of worship, speech, press, right of peaceful assembly, right to petition the government. I am 13 years old, and I do not want the country left to me to lose the rights and freedoms that our America treasures. Please consider my complaint, and include the input of the common citizen. Thank you.
